

THE FUTURE OF THE BERKELEY MICROLAB HAS ARRIVED !

Equipment Donations have always been a key to the Berkeley Microlab's success. The Microlab also welcomes equipment components and spare parts – complete systems are not required. The Microlab has gratefully accepted items as varied as rebuilt vacuum pumps, SS tubing, and excess wafer stock. All these items have been put to work supporting research! Donations to the Microlab can have valuable tax benefits for your company. Your donation will be formally acknowledged by the University and appropriate IRS related verification provided.

Microlab management will provide immediate review of any proposed items. If you would like to evaluate whether your items would compliment our operation, please contact:

Dr. Bill Flounders, Microlab Technology Manager
Bob Hamilton, Microlab Facilities Manager

Some highlighted needs for the new laboratory transition and startup are as follows:

- Wet Process Stations / wafer sinks
- 200mm horizontal tube furnaces
- PVD systems
- PECVD systems
- vacuum pumps
- mass flow controllers
- laboratory or gowning area storage systems or furniture
